

ENERGY POLICY

At NEDEX, we are committed to:

- Establishing objectives aligned with this Policy through the active participation of our employees, defining the necessary actions to achieve these objectives, and providing the required resources.
- Complying with all applicable energy-related laws, regulations, and other requirements.
- Maintaining effective communication with all stakeholders to create shared value and achieve beneficial outcomes in energy management.
- Utilizing appropriate resources and technologies to ensure effective energy management and control.
- Continuously improving energy performance by enhancing energy efficiency and reducing energy intensity across all our processes.
- Regularly monitoring, measuring, analyzing, and evaluating our energy consumption and energy performance indicators, while supporting data-driven decision-making processes.
- Promoting the efficient use of natural resources and energy, while increasing the share of renewable energy sources in our overall energy consumption.
- Managing our energy activities in line with our climate change commitments and supporting initiatives aimed at reducing greenhouse gas (GHG) emissions.
- Reducing energy consumption through continual improvement initiatives related to energy efficiency, while monitoring the implementation and effectiveness of these improvements.
- Procuring energy-efficient products and services and ensuring that energy performance improvement is considered in procurement and design activities.
- Increasing the use of renewable energy sources and supporting the transition to low-carbon energy solutions.
- Continually improving, documenting, communicating, reviewing, and maintaining the effectiveness of our Energy Management System.
- Raising awareness of energy efficiency among our employees and contributing to the awareness of our suppliers, contractors, visitors, and the local community.
- Working collaboratively with our stakeholders, suppliers, contractors, and employees to achieve mutual benefits in energy management.
- Providing all necessary information, resources, and support by Top Management to ensure the achievement of our energy objectives and targets.
